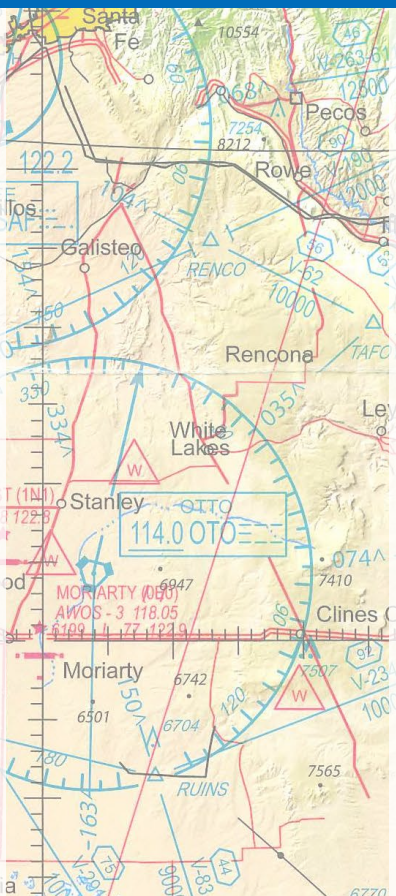
- ▲ Airport Layout Planning
- ▲ Funding Management
- ▲ Airport Infrastructure & Design
- ▲ NAVAIDS
- ▲ Survey and Spatial Data
- ▲ Construction Phase Support



A mile of road will take you a mile,
a mile of runway will take you *Anywhere.*

The BHI Advantage

Bohannan Huston (BHI) is an award-winning, nationally recognized firm specializing in Engineering, Spatial Data, and Advanced Technologies since 1959. Our technical expertise enables clients to visualize projects, optimize resources, and realize exceptional solutions. We provide the foundation upon which complex projects are successfully constructed.

Full Range of Services

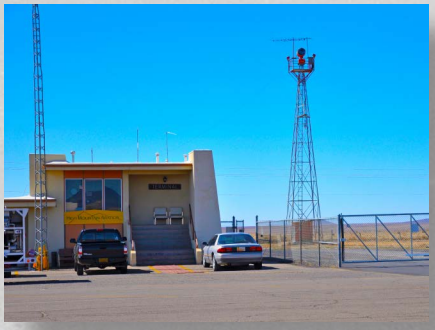
BHI provides the complete suite of services under one roof. We work with our aviation clients to develop the vision for their projects and provide guidance from concept to construction. Our staff cover the entire project development lifecycle-from data collection, project planning, funding assistance, design, to construction phase support-to guide projects all the way through to construction and closeout.

Local Commitment

We have a vested interest in improving our local communities. As a New Mexico-founded corporation with over 160 employees, BHI has committed the people and resources to become partners with New Mexico counties and municipalities for over 55 years. We are proud to be one of the largest locally-owned engineering firms in the state and honored to have provided clients in every corner of New Mexico with exceptional services.

Responsive Client Services

Our clients are our greatest priority. On a daily basis, BHI staff works together to produce high-quality projects suited to the needs of each of our clients. We maintain a knowledgeable and professional staff that is capable of responding to aggressive project schedules and complex tasks. At the cornerstone of this successful collaboration is effective communication between our team and our clients.



Your Aviation Team

Dumas Slade | Aviation Manager

Dumas has been instrumental in solving diverse airport design and construction issues throughout New Mexico. With over 40 years of specialized experience, Dumas brings valuable insight to aviation projects. His major projects have been for the Albuquerque International Sunport, Sierra Blanca Regional Airport near Ruidoso, and airport projects for Raton, Clayton, Roswell International Air Center, Truth or Consequences, Doña Ana County International JetPort at Santa Teresa, Artesia, Grants, Gallup, Deming, Hobbs, Clovis, Santa Rosa, Tucumcari, Portales, Conchas Lake, Aztec, and Farmington.

Throughout his 40 years in the industry, Dumas has completed over 200 projects involving project management, airport plans and facility assessments, airport design, construction management, construction inspection, quality control, and funding coordination, as well as ground-up development of four new airports.

Dumas also has extensive experience with FAA and State Aviation Division grant pre-application, application, and Overall Development Objective (ODO) preparation, as well as project phase grant management including reimbursement assistance.

Mark Huntzinger, PE | Senior Aviation Engineer

Mark brings the owner's perspective to aviation projects. With public-sector work as a City Manager and private-sector work as a consulting engineer, Mark has more than 35 years of expertise in aviation project planning, design, construction, and construction management, as well as in handling purchasing arrangements with consulting firms and with other federal, county, and municipal government agencies.

As an aviation engineer, he has specialized in planning and engineering at airports ranging from large commercial service to general aviation airports, completing over 50 airport development projects at the Farmington-Four Corners Regional, Clovis Municipal, Sierra Blanca Regional, Grant County, Doña Ana County International JetPort at Santa Teresa, Truth or Consequences Municipal, Deming Municipal, Santa Rosa-Route 66, Aztec Municipal, Gallup Municipal, and many other airports.

Mark's project management experience includes runway, taxiway, and apron extensions and reconstruction, installation of NAVAIDS and lighting systems, pavement maintenance, and the installation of security fences. His involvement in these projects includes planning, local, FAA, and State Capital Improvement Plans, FAA ODO development, environmental documentation and compliance, design, bidding assistance, award evaluation and recommendation, and construction phase services.

Aviation Services

- **Airport Master & Action Plans**
- **Airport & Electrical Layout Planning**
- **Community Involvement Support**
- **Construction Phase Support**
- **DBE Coordination**
- **FAA, State, Local & Grant Requirements**
- **Funding Management**
- **Infrastructure Design**
- **NAVAIDS**
- **Runway, Taxiway & Airport Design**
- **Site Selection Studies**
- **Survey & Spatial Data**
- **Visual Aids**

Bohannan Huston

Who We Are…

For over 55 years Bohannan Huston has provided world-class civil and structural engineering, mechanical and electrical engineering, water resources, construction management, land surveying, GIS, photogrammetry, and advanced technology services. Our ability to provide a wide range of services combined with our technical expertise enables us to deliver exceptional projects from concept through completion, transforming our clients' visions into constructed reality. We have the depth of resources to expedite the development process and fast-track schedules for our clients.

- **Traffic & Transportation**
- **Community Development & Planning**
- **Electrical & Mechanical Engineering**
- **Structures**
- **Water Resources & Systems**
- **Construction Engineering Services**
- **Geospatial Technologies**
- **Surveying & Mapping**
